

Power Services

A HENKELS & MCCOY Group Company

An Industry Leader

Henkels & McCoy, Inc. (H&M) provides construction and maintenance services to the electric transmission and distribution infrastructure throughout North America. Our experience in this industry spans more than 75 years, with the Great New England Hurricane of 1938 marking the transition of the company from a tree-trimming and landscaping firm to a key player in utility infrastructure and power restoration.

With over 70 regional, area, and project offices, and more than 6,500 pieces of equipment strategically deployed throughout the country, H&M's national footprint enables us to mobilize quickly and efficiently.

Commitment to Safety

Safety is of the utmost concern for our employees, our customers, and the general public. H&M has been recognized with an E. I. DuPont Safety Excellence Award and is a founding member of the Electrical Transmission and Distribution (ET&D) partnership, a formal collaboration of industry stakeholders working to reduce fatalities, injuries, and illnesses in the electric line construction industry.

On projects of all scales and levels of complexity, H&M is committed to providing safe and reliable power to our customers and their customers.

Market Segments

Transmission

- Aerial construction
- Underground construction
- Maintenance
- Emergency restoration
- EPC

Substation

- Electrical construction
- Civil construction
- Maintenance
- Emergency restoration
- EPC

Distribution

- Aerial construction
- Underground construction
- Maintenance
- Emergency construction
- EPC

PERFORMANCE has built our business...®

Power Services Capabilities

- Aerial transmission to 765 kV
- Underground transmission to 230 kV
- Aerial and underground distribution to 69 kV
- Extra-high voltage (EHV) experience
- Substations - AIS and GIS
- Project and program management
- Survey and constructability analysis
- Emergency restoration
- Renewable energy

With decades of experience serving clients in the power industry, H&M Inc. has the experience, skilled labor, effective management, and latest technology to deliver power projects safely, on time, on budget, and with care for the environment.

Through partnering arrangements, H&M offers engineering, procurement, and construction (EPC) services that span transmission line and substation engineering, work planning, risk analysis, environmental assessment, material procurement, warehousing and logistics, ROW acquisition, road building, site grading, and quality control.

Emergency Response

The Great New England Hurricane of 1938 marked the transition of H&M, Inc. from a tree trimming and landscaping company to a key player in utility infrastructure and power restoration. Our long history is replete with examples of prompt, effective response to local emergencies and major disasters in the most challenging settings. Whether the customer is large or small, from Hawaii to the Gulf Coast, our national footprint enables us to mobilize quickly and efficiently.
